

## Lighting

The lighting range ensures the workspace receives proper illumination to prevent eye strain and increase worker productivity. The range includes highly efficient lighting units that help to reduce energy costs and can minimise an organisation's carbon footprint.

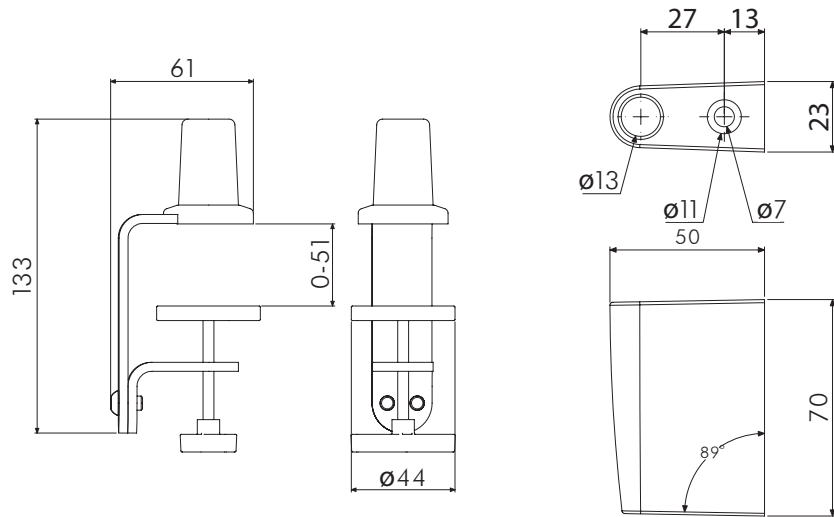

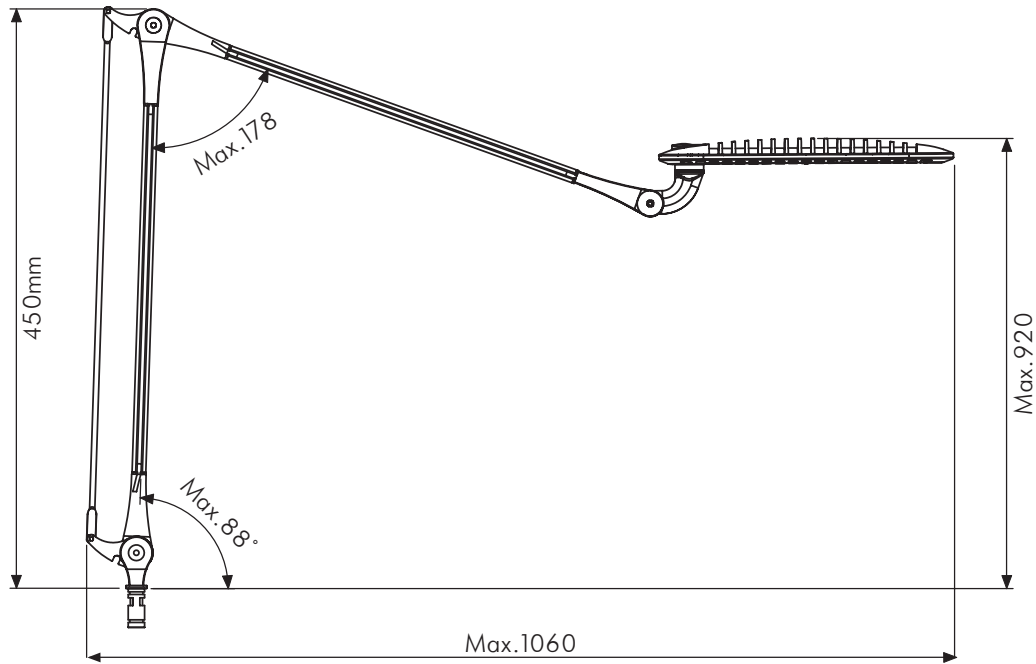

# Wave LED Task Light

- Wave light is uniquely effective and efficient in reducing energy costs, provides proper illumination, prevents eye strain and increases worker productivity.
- The Wave light was designed to meet the most demanding quality and functional standards for the office environment.
- Wave Light will integrate with virtually any furniture system, clamped to the surface or mounted to panels, slat wall, beams or tool rails. Patented refractive lens technology and dimming capability eliminates traditional problems with regard to illumination, light pooling, shadows, glare and light contrast ratios.
- Illuminated surfaces appear more natural in colour under LED light than compact fluorescent which tends to cast a bluish tint.
- The LED light uses significantly less energy than conventional fluorescent lights.
- The Wave light's sleek appearance helps to make this light unrivalled in the market place.

**C Clamp**

**Vertical Mount**

## Wave

<b>Mounting</b>	C Clamp - <i>see drawings opposite</i> Vertical Mount - <i>see drawings opposite</i> Weighted Base - diameter 200mm
<b>Construction</b>	<b>Head</b> - aluminium die casting <b>Arms</b> - aluminium extrusion <b>Joints</b> - zinc die casting <b>Mounting</b> - <i>see drawings opposite</i>
